

CONSENT FOR OPTOS SCREENING

TallmanEye.com (978) 688-6182

ACKNOWLEDGEMENT OF OPTOS SCREENING POLICY

Some serious eye diseases, such as diabetic retinopathy, retinal detachment, or malignant tumors (which can result in blindness, loss of an eye, or death) can only be detected by wide-field examination of the retina inside the eye. The preferred method at Tallman Eye Associates is dilation using eye drops. While retinal and cataract exams cannot be done without chemical dilation, there are some routine eye exams that can be done using OPTOS retinal imaging.

I understand that OPTOS retinal imaging is not covered by my insurance, and I will be charged a **\$40 fee** at the time of check-out from today's appointment.
