ADVANCED LENS OPTIONS FOR CATARACT SURGERY

Advances in lens technology allow you to choose the vision solution that best fits your lifestyle.

Ask your doctor which option is right for you.

BASIC IMPLANT (STANDARD IOL)

BENEFITS

- ✓ Improves vision
- ✓ Colors are brighter
- ✓ Corrects glare

DISADVANTAGES

- ✗ Does not correct astigmatism
- ✗ Glasses will be needed for near, intermediate and distance

A great option for clear vision with glasses.

TORIC IOL

BENEFITS

- ✓ Improves vision
- ✓ Colors are brighter
- ✓ Corrects glare
- ✓ Corrects astigmatism
- ✓ Excellent distance vision
- ✓ Fair intermediate vision
- ✓ No halos

DISADVANTAGES

- ✗ Glasses will be needed for near
- ✗ May sometimes need glasses for intermediate tasks

Excellent distance vision with less dependence on glasses.

EXTENDED VISION IOL

BENEFITS

- ✓ Improves vision
- ✓ Colors are brighter
- ✓ Corrects glare
- ✓ Corrects astigmatism
- ✓ Excellent distance vision
- ✓ Excellent intermediate vision
- ✓ No halos
- ✓ Excellent contrast

DISADVANTAGES

- ✗ Glasses will be needed for fine print

Excellent distance and intermediate vision without night driving halos.

MULTIFOCAL IOL

BENEFITS

- ✓ Improves vision
- ✓ Colors are brighter
- ✓ Corrects astigmatism
- ✓ Excellent distance vision
- ✓ Good intermediate vision
- ✓ Good near vision
- ✓ Reduced dependence on glasses

DISADVANTAGES

- ✗ Some halos with night driving
- ✗ Some loss of contrast sensitivity

Great option for those who want more freedom from glasses.
